<b>Goals</b>	
	Create stable and reliable software the industry partner is satisfied with
	Pass the course and have a successful project and collaboration with the industry partner
	Interpersonal relationship objectives: increase team building skills
	Learn about Scrum and IT Project work
<b>Meeting norms</b>	
	We come to the meeting on time (5 min grace period), end the meeting on time and switch on our cameras
	If someone is not able to attend the meeting, let everyone else know as soon as possible (give update on own tasks through Discord)
	Get together depending on the workload/tasks, i.e. SD meeting / PO meeting when necessary
	Do not hesitate to work in small groups, we are a team! (3 meetings at max as a whole team)
<b>Working norms</b>	
	Everyone contributes regularly. If someone has a lot of other work to do in a week, inform the POs and try to balance it out the next week.
	Agree on a coding convention.
	If we have difficulties with the tasks, we speak about it openly. We do not hope that no one will notice.
<b>Coordination norms</b>	
	We always make sure to clearly and unambiguously designate responsibilities.
	When we assign To Dos, we always make sure that the tasks are fairly distributed among the group members.
	Tasks are assigned via GitHub or stated in the meeting protocols.
<b>Communication norms</b>	
	Check the communication channels at least every 24h (small stuff & quick response in WhatsApp)
	Don't interrupt each other
	We have an open and clear communication style. Everyone is able to address his/her concerns at all times. We always stay respectful.
	Luis and Elias as POs will initiate the contact to the industry partner. The whole group will always be added into the CC when communicating with the industry partner.
<b>Consideration norms</b>	
	We love diversity, that's why we value every comment
	Direct, open and constructive feedback is desired to achieve the best possible results.
<b>Cont. improvement norms</b>	
	Everyone does the Standup E-Mails at least twice per week
	Happiness index is done once a week in the retrospect of the sprint
	Track the teams process via the Kanban board
<b>Rewards</b>	
	Mid term reward: Bergkirchweih Meet-up
	End of the project reward: Restaurant or Bar Meet-up
<b>Sanctions</b>	
	Group-Pot: Money we will use together on our "reward-meetings" - If you are late: 1€ per minute (over the 5 grace-minutes) [5€ max. per meeting]
	Not attending a meeting without informing the others will be punished with cake for the whole group (think about ways how to distribute it to the homes of the group members yourself)

	Sportive sanction: 5 push ups/situps per minute late (counted after the 5minutes limit)
<b>Signature</b>	
	Jannik Schütz, Luis Meister, Elias Werner, Xiangxiang Chen, Dominik Pysch, Adrian Wandinger, Marib Aldoais, Leo Köberlein, Nicolas Stellwag

Product Vision	Project Mission
<p>Loosing important devices that are indispensable in daily life is annoying. The "Find my BLE device" app solves this problem and makes life more convenient by allowing users to locate their devices at any time. Whether a relevant device has been lost or just can't be found when pressed for time, this app makes customers' lives easier and more convenient.</p>	<p>The mission of this project is to create an app for WSA by providing the feature of locating BLE devices. The app should be able to detect BLE devices and assign labels to it. In addition it helps tracking the device and navigating to the exact location of the device no matter if in short or long distance. This ensures an overview of all relevant devices at all times.</p>

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
6	Finalize MVP functionalities	Finalizing functionalities and ensure clean run of the App			18		18	
			#70 List dummy BLE devices in Surrounding	1		2		
			#72 Extract list that contains all devices that are emitting a Bluetooth signal	2		2		
			#73 Extract human readable name of each device that are emitting a Bluetooth signal	2		1		
			#74 Extract signal strength of selected devices	5		5		
			#80 Combine Logic and UI	3		2		
			#49 Select one BLE device	3		3		
			#104 Take care of customer mail	2		3		
7	Completion of the Signal Strength Functionality	Finish Signal Strength Solution and Ensure Code Coverage >70%			22		21	
			#129 remove unnecessary code components	2				
			#128 Lay foundations for UI test	5				
			#93 Implement discussed software hierarchy	5				
			#120 Ensure >75% test code coverage	5				
			#96 Indicate that BLE device is very close to the user	2				
			#117 Indicate BLE device is out of range	3				
8	Adjustment of signal strength solution and research of Geolocation Solution	Further develop signal strength feature, enhance usability, get started with geolocation feature			21		21	
			Correct handling of different entry points (different views)					
			Mapping of RSSI-value to meters (with note that without obstacles, ...)					
			Ensure nice welcome screen					
			Allow user to directly jump to signal strength solution if he is already connected to a bluetooth device					
			Write UI-tests to make sure we reach the 75 % code coverage threshold					
			ensure that devices that were previously used/labeled & saved within the app are recognized when user enters the app at a later point of time again					
			Delete "Scan"-button on the top right corner within detection view					
			Include two new pictograms within detection view					
			Jannick provides update on previous research regarding geolocation solution to the rest of the team					
			Display GPS signal of a device as a number					
9	Implementation of geolocation solution	Show map with GPS coordinate of a selected device and lay foundation for distance calculation			21		21	
			Visually encode within saved devices those devices that are currently emitting a bluetooth signal					

#	Theme	Goal	Feature Name	Est. Size (Feature)	Est. Size (Sprint)	Real Size (Feature)	Real Size (Sprint)	Burn-Down
			Check if device is currently emitting a GPS signal, if yes, update the GPS signal displayed in the app					
			Integrate map in the geolocation feature with the option to display certain GPS coordinate and adapt design to our CI					
			Make sure to display current position of the user on the map					
			Make sure to display distance from current position of user to searched device					
			Start with UI improvement suggestions within Figma					
10	MVP Geolocation Solution	Ensure fluent run of geolocation feature without major bugs			21		21	
			Allow user to switch for navigation to selected device to apple maps or google maps					
			Show required time it takes user to navigate to selected device by car, by foot, ... within the app					
			Customer meeting: Die sollen in der next Week (sprint 11) schauen, was sie noch wollen, damit wir das in Sprint 12 und 13 noch umsetzen können ...					
			buffer for: bug elimination and testing					
			Usability: Allow user to switch screen by swiping left from displayed devices -->					
11	Test with final product and UI improvements	Ensure solid functionality of scenarios provided by customer			24		24	
			implement suggestion made by POs regarding UI of the app (FIGMA)					
			create "guided tour" for first usage of the app with layer on top					
			POs: Based on user scenarios with test cases and "expected behaviors", SDs make sure that expected behavior is implemented (POs write test cases and SDs test and report Bugs, ...)					
12	Last functional adjustments and UI adjustments	Ensure correct implementation of adjustments that were provided by the customer in former sprint			24		24	
			Implement final feedback from customer provided in the mail by the end of last week					
13	Final Checks for Project Release	Ensure all mandatory requirements of the customer are met and go hand in hand with our definition of done for the final release			24		24	
			Testing					
			Final bug checking
